Hydropower Plants within Watersheds containing Salmo Salar (Atlantic Salmon) in the U.S. Lower 48 States

Notes:
[1] Species range is defined based upon current occurrences of Atlantic Salmon within 8-digit hydrologic unit code (HUC) watersheds according to NatureServe’s “Digital Distribution Maps of the Freshwater Fishes in the Conterminous United States” (2010). Locations and attributes of species from NatureServe were mapped as-is and have not yet been empirically verified and validated by Oak Ridge National Laboratory (ORNL). Please interpret with caution as the actual range may differ from this map.
